

Really Sick Patients

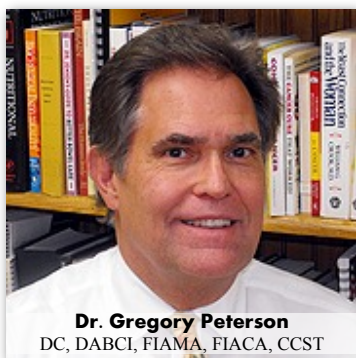

Where To Start... What To Do

Get Results With Tough Cases

Dr. Peterson's practice has been increasingly dominated by very, very ill patients, because of the results he gets with tough cases.

In this seminar he will share the systematic format he has developed to successfully evaluate and help really sick patients.

When you start getting results with these cases, your patient referrals can really take off.

Dr. Gregory Peterson
DC, DABCI, FIAMA, FIACA, CCST

Gregory Peterson, DC, DABCI, FIAMA, FIACA, CCST is a chiropractor, chiropractic internist, certified chiropractic acupuncturist, clinician, clinical consultant and lecturer. He has completed over 400 hours of specialized training as a chiropractic internist and 350 hours of kinesiology training. He also draws on his diverse education in chemistry, physiology, nutrition and the health care field to offer a fresh, innovative approach to health. He applies up-to-date scientific and medically documented methods to bring you the latest and best information, procedures, techniques and treatment protocols.

Help With Tough Cases (Loved Ones)

Learn His Step-By-Step Approach

When it comes to chronic disease, there are three factors that must be considered. Unless these are in balance, any relief will be temporary at best.

- An acidic chemistry (*causing over oxidation and hypoxia*)
- Infections (*including dysbiosis and parasites*)
- Insulin dysregulation

Dr. Greg Peterson has made these three factors a cornerstone of his clinical practice. He will share the systematic format he developed to evaluate these underlying influences, and then how he treats the imbalances to restore homeostasis.

Dr. Peterson is one of my wellness mentors, and I often call him to discuss tough cases.
