

10-Day Bio-Detox Kit

Why you may need the 10-Day Bio-Detox Kit: All Healthcare Practitioners share common goals in regard to their patients; restore balance & homeostasis, and address the underlying causes of pain, inflammation, and chronic health issues. One of the leading challenges to addressing these clinical goals is the presence of an overwhelming toxic load (endogenous and exogenous), which impairs many pathophysiological systems, including Phase I and Phase II conjugation, and excretion, and may contribute to dysbiosis, increased gut permeability, macronutrient and micronutrient imbalances, and multiple enzymatic imbalances. These widespread physiological disturbances impair the body's ability to effectively handle health challenges, thus often resulting in chronic health issues which may prove to be resistant to traditional therapies.

Why your healthcare practitioner recommends 10-Day Bio-Detox Kit:
