

Bio-Ae-Mulsion Forte®

Why you may need Bio-Ae-Mulsion Forte®: Vitamin A is a potent, fat soluble vitamin that supports many crucial roles within the body. In addition to its well known role in improving night and low-light vision, vitamin A is also needed for the structure and integrity of epithelial cells that comprise the skin, mucosal membranes, respiratory and reproduction passages, along with the lining of the intestine. It is also required for skeletal growth and maintenance, and plays an important role in immunological functioning. Vitamin A deficiency is frequently associated with fatigue, dry skin, eyes, mouth, or hair, calluses on the hands or feet, heel cracks, acne, poor growth, impaired low-light vision, and insomnia. Caution should be applied when utilizing vitamin A and any of the fat-soluble vitamins, and for this reason, you should follow the specific dosing requirements your healthcare provider prescribes. Excessive doses can cause many problems.

Why your healthcare practitioner recommends Bio-Ae-Mulsion Forte®:

Bio-Ae-Mulsion Forte® is a singularly unique supplement to Biotics Research. Thorough research culminating in a proprietary process utilizing natural gums and emulsifiers results in a vitamin A supplement with as small of a particle size as possible. This small particle size is akin to the particle size of emulsified fats found in breastmilk - nature's most effective delivery system. This results in a unique delivery system that is absorbed directly into the lymphatic system, which is vastly superior to competitors' products that rely on harsh chemicals and synthetic detergents to break down the hydrophobic bonds between the fat soluble vitamin and water. These chemically altered fat-soluble vitamins enter the blood stream, and are much more likely to cause toxicity issues than natural emulsion equivalents like **Bio-Ae-Mulsion Forte®**. Just like when you make salad dressing, you can combine the oil and water by shaking it together, but if you let it sit for any length of time, the two will naturally separate into distinct layers. **Bio-Ae-Mulsion Forte®** is a true emulsification that will retain its crucial integrity so absorption is optimized. If you want to perform a simple test to compare **Bio-Ae-Mulsion Forte®** to competitors' Vitamin A emulsifications, place a few drops of each supplement into a glass of water and observe them the next day. **Bio-Ae-Mulsion Forte®** will maintain its emulsification while competitors' products are quite likely to be found floating on the surface of the water.

Supplement Facts

Serving Size: 1 Drop

	Amount Per Serving	% Daily Value
Vitamin A (as palmitate)	12,500 IU	250%

Other ingredients: Water and gum arabic emulsifier base, and d-alpha-tocopherol (as an antioxidant).

Bio-Ae-Mulsion Forte® is an oil-in-water emulsion. Vitamin A oil has been dispersed into microscopic particles to aid absorption and assimilation.

RECOMMENDATION: One (1) drop each day as a dietary supplement or as otherwise directed by a healthcare professional.

WARNING: For adult use only. Keep out of reach of children. Use only as recommended unless otherwise directed by a healthcare professional. Excessive consumption of vitamin A has been shown to cause serious health problems.

Caution: Not recommended for pregnant or lactating women.

KEEP OUT OF REACH OF CHILDREN

Store in a cool, dry area.

Sealed with an imprinted safety seal for your protection.

NDC #55146-01002 Rev. 11/10
