

Support For Cardio, Brain, Immune & Aging

CoQ-Zyme 100 Plus

Each capsule of CoQ-Zyme 100 Plus supplies 100 mg of emulsified coenzyme Q10, as well as a full complement of important B vitamins, with each capsule supplying 100% of the Daily Value of B-complex vitamins, along with 80 mcg each of SOD and Catalase from our exclusive Vegetable Culture. Based on a double blind clinical study, daily ingestion of 1 tablet (30 mg) of Biotics Research Corporation's emulsified CoQ10 for 4 weeks was demonstrated to increase plasma CoQ10 levels by 210%, equivalent to 90-100 mg of dry CoQ10. Furthermore, dry CoQ10 powder increased serum levels in only 57% of subjects, while the Biotics Research Corporation emulsified CoQ10 produced an increase in serum CoQ10 levels in 80% of the subjects.

As a cellular component, CoQ10 has two primary functions in the body; first, to act in the transfer of electrons as a necessary part of ATP production, and second, to function as an essential antioxidant. CoQ10 participates in all energy processes in the body, and has been termed "the hub around which life processes revolve in the human body." It also plays a vital role in the cellular membrane, functioning in its stability, fluidity and permeability, in addition to stimulating cell growth and inhibiting cell death.

In a clinical study the emulsified Coenzyme Q10 produced by Biotics Research raised blood levels an average of two-three times that of any of the dry forms available.
