

VasculoSirt

Healthy Heart and Artery Support

Vascular aging is characterized by progressive arterial stiffness, loss of arterial elasticity and arterial compliance from a myriad of structural and functional changes in the endothelium, vascular media and adventitia. VasculoSirt's revolutionary nutritional formula is designed to: slow vascular aging, promote vascular and heart health, provide support for healthy blood pressure, cholesterol, glucose and insulin levels within normal ranges, and support sirtuin activity and longevity.

Not only is VasculoSirt one of the most comprehensive cardiovascular and anti-aging supplements available, but each bottle of VasculoSirt takes the place of up to 13 separate supplements, providing distinct cost and convenience advantages for your patients. Dr. Mark Houston, Associate Clinical Professor of Medicine at Vanderbilt Medical School and Director of the Hypertension Institute and Vascular Biology in Nashville, in conjunction with Biotics Research Corporation developed VasculoSirt, a state of the art nutritional supplement amalgamating the optimal nutrient levels used in a wide variety of clinical studies.

In keeping with Biotics Research Corporation's dedication to providing superior leading-edge supplements, each serving of VasculoSirt supplies 50 mg of Resveratrol (Trans-Resveratrol), 50 mg of R-Lipoic Acid, 250 mg of EGCG (Epigallocatechin Gallate), and 50 mg of Coenzyme Q10 (emulsified for increased uptake and utilization), along with 23 other micro nutrients that have been shown to support a wide variety of cardiovascular processes.

VasculoSirt was released for clinical use in August 2007 and is the first nutraceutical supplement designed to promote vascular and heart health, slow vascular aging, improve endothelial function and arterial compliance, support healthy blood pressure levels and possibly normalize atherosclerotic markers.

Over the past five plus years, VasculoSirt has been clinically evaluated in well over 1,000 patients at the Hypertension Institute. Dr. Mark Houston has found that when VasculoSirt is used with an optimal program of nutrition, exercise, and weight management, significant improvements in vascular health were typically noted.

Healthy Aging Requires Health Arteries And Healthy Heart
